

"I know what I want to say, I just can't say it!"

Do you ever feel like that?

We are looking for STROKE SURVIVORS who are between the ages 40 and 85 to take part in our research projects.

Who we are

The Laboratory for Research on Aphasia and Stroke is directed by **Dr. Tracy Love**, Associate Professor in Speech, Language and Hearing Sciences at SDSU and a Research Scientist in the Dept. of Psychology at UCSD.

We have two testing locations for your convenience

- University of California, San Diego in La Jolla
- Alvarado Medical Center (Near San Diego State University)

Those who participate

- help in the understanding of how the brain processes language. This is critical for improving treatments to assist in the rehabilitation of stroke survivors.
- join us for approx. 5 testing sessions, each lasting about 60 minutes, in a comfortable, friendly environment
- will be compensated \$15 for time and travel each visit.

If you have questions, or are interested in participating,
Please contact us at either UCSD (858) 534-7356
or SDSU (619) 594-7880

You can also visit our website at: <http://slhs.sdsu.edu/tlove>
Thank you for your time!
