

PREDOCTORAL TRAINING GRANT

Neurocognitive Approaches to Communication Disorders

NIH NIDCD T32 DC00731
2017-2022

The primary aim of our training program is to educate clinically sophisticated scientists who will apply their research skills to the study of language and communicative disorders, and who will apply their clinical acumen to their research endeavors. Our training program educates students who will become the future of the academic professions with the breadth necessary to fill academic positions in a myriad of departments and fields, while they maintain a focus on clinical research.
