Lecture series  
Spring 2017

Feb. 6  
**Ruth Carper** (Psychology)  
*Typical & atypical brain development across the lifespan: Anatomical MRI & diffusion imaging*

Feb. 20  
**Inna Fishman** (Psychology)  
*Social cognition and developmental disorders: Event-related potentials and functional (connectivity) MRI*

Feb. 27  
**Sarah Mattson** (Psychology)  
*Alcohol and the developing brain: Neuropsychological studies of fetal alcohol spectrum disorders*

Mar. 6  
**Daniel Goble** (Exercise & Nutritional Sciences)  
*Effects of concussion on motor control and balance*

Mar. 13  
**Marty Sereno** (Psychology)  
*Vision, retinotopy, and maps in the brain: fMRI and multimodal imaging*

Mar. 20  
**Karen Emmorey** (Speech, Language, and Hearing Sciences)  
*Language without hearing – What sign languages reveal about human language and the brain*

Apr. 3  
**Stéphanie Riès** (Speech, Language, and Hearing Sciences)  
*Neuronal bases of language production: Intracranial recording and stimulation in neurosurgical patients*

Apr. 10  
**Philip Holcomb** (Psychology)  
*Reading and developmental dyslexia: ERP*

Apr. 17  
**Ksenija Marinkovic** (Psychology)  
*When the executive gets drunk: MEG, alcohol, and cognitive control*

Apr. 24  
**Nader Amir** (Psychology)  
*Treatment approaches in anxiety disorders: Neurofeedback training & transcranial magnetic stimulation*

May 1  
**Kee Moon** (Mechanical Engineering)  
*Brain-computer interfaces for communication and control*

All talks Mondays, 2pm, 6363 Alvarado Ct., Suite 250
